MARKING GUIDELINES

MARKS: 150

These marking guidelines consist of 23 pages.

1. SOURCE-BASED QUESTIONS

1.1 The following cognitive levels were used to develop source-based questions:

| Cognitive Levels | Historical skills | Weighting of questions |
|------------------|---|------------------------|
| LEVEL 1 | <ul style="list-style-type: none"> Extract evidence from sources Selection and organisation of relevant information from sources Define historical concepts/terms | 30% (15) |
| LEVEL 2 | <ul style="list-style-type: none"> Interpretation of evidence from sources Explain information gathered from sources Analyse evidence from sources | 40% (20) |
| LEVEL 3 | <ul style="list-style-type: none"> Interpret and evaluate evidence from sources Engage with sources to determine its usefulness, reliability, bias and limitations Compare and contrast interpretations and perspectives presented in sources and draw independent conclusions | 30% (15) |

1.2 The information below indicates how source-based questions are assessed:

- In the marking of source-based questions, credit needs to be given to any other valid and relevant viewpoints, arguments, evidence or examples.
- In the allocation of marks, emphasis should be placed on how the requirements of the question have been addressed.
- In the marking guideline, the requirements of the question (skills that need to be addressed) as well as the level of the question are indicated in italics.
- When assessing open-ended source-based questions, learners should be credited for any other relevant answers.
- Learners are expected to take a stance when answering 'to what extent' questions in order for any marks to be awarded.

1.3 Assessment procedures for source-based questions

- Use a tick (✓) for each correct answer.
- Pay attention to the mark scheme e.g. (2 x 2) which translates to two reasons and is given two marks each (✓✓✓✓); (1 x 2) which translates to one reason and is given two marks (✓✓).
- If a question carries 4 marks then indicate by placing 4 ticks (✓✓✓✓).

Paragraph question

Paragraphs are to be assessed globally (holistically). Both the content and structure of the paragraph must be taken into account when awarding a mark. The following steps must be used when assessing a response to a paragraph question:

- Read the paragraph and place a bullet (.) at each point within the text where the candidate has used relevant evidence to address the question.
- Re-read the paragraph to evaluate the extent to which the candidate has been able to use relevant evidence to write a paragraph.

- At the end of the paragraph indicate the ticks (✓) that the candidate has been awarded for the paragraph; as well as the level (1,2, or 3) as indicated in the holistic rubric and a brief comment e.g.

Level 2 ✓✓✓✓✓

Used mostly relevant evidence to write a basic paragraph

- Count all the ticks for the source-based question and then write the mark on the right hand bottom margin e.g. $\frac{32}{50}$
- Ensure that the total mark is transferred accurately to the front/back cover of the answer script.

2. ESSAY QUESTIONS

2.1 The essay questions require candidates to:

- Be able to structure their argument in a logical and coherent manner. They need to select, organise and connect the relevant information so that they are able to present a reasonable sequence of facts or an effective argument to answer the question posed. It is essential that an essay has an introduction, a coherent and balanced body of evidence and a conclusion.

2.2 Marking of essay questions

- Markers must be aware that the content of the answer will be guided by the textbooks in use at the particular centre.
- Candidates may have any other relevant introduction and/or conclusion than those included in a specific essay marking guideline for a specific essay.

2.3 Global assessment of the essay

The essay will be assessed holistically (globally). This approach requires the teacher to assess the essay as a whole, rather than assessing the main points of the essay separately. This approach encourages the learner to write an original argument by using relevant evidence to support the line of argument. The learner will **not** be required to simply regurgitate content (facts) in order to achieve a level 7 (high mark). This approach discourages learners from preparing essays and reproducing them without taking the specific requirements of the question into account. Holistic marking of the essay credits learners' opinions that are supported by evidence. Holistic assessment, unlike content-based marking, does not penalise language inadequacies as the emphasis is on the following:

- The learner's interpretation of the question
- The appropriate selection of factual evidence (relevant content selection)
- The construction of an argument (planned, structured and has an independent line of argument)

2.4 Assessment procedures of the essay

2.4.1 Keep the synopsis in mind when assessing the essay.

2.4.2 During the reading of the essay, ticks need to be awarded for a relevant introduction (which is indicated by a bullet in the marking guideline), the main aspects/body of the essay that sustains/defends the line of argument (which is indicated by bullets in the marking guideline) and a relevant conclusion (which is indicated by a bullet in the marking guideline). For example in an essay where there are five (5) main points there could be about seven (7) ticks.

2.4.3 Keep the PEEL structure in mind in assessing an essay.

| | |
|----------|---|
| P | Point: The candidate introduces the essay by taking a line of argument/making a major point. Each paragraph should include a point that sustains the major point (line of argument) that was made in the introduction. |
| E | Explanation: The candidate should explain in more detail what the main point is about and how it relates to the question posed (line of argument). |
| E | Example: Candidates should answer the question by selecting content that is relevant to the line of argument. Relevant examples should be given to sustain the line of argument. |
| L | Link: Candidates should ensure that the line of argument is sustained throughout and is written coherently. |

2.4.4 The following additional symbols can also be used:

- Introduction, main aspects and conclusion not properly contextualised

2.5 The matrix

2.5.1 Use of the matrix in the marking of essays

In the marking of essays, the criteria as provided in the matrix should be used. When assessing the essay note both the content and presentation. At the point of intersection of the content and presentation based on the seven competency levels, a mark should be awarded.

- (a) The first reading of the essay will be to determine to what extent the main aspects have been covered and to allocate the **content level** (on the matrix).

| | | |
|---|---------|--|
| C | LEVEL 4 | |
| | | |

- (b) The second reading of the essay will relate to the level (on the matrix) of **presentation**.

| | | |
|---|---------|--|
| C | LEVEL 4 | |
| P | LEVEL 3 | |

- (c) Allocate an overall mark with the use of the matrix.
